Dear Jeff,

I would like to profusely thank you and your team (particularly Ai Bit Toh) on what an incredible job Innogen did for WGC2012. Your team's professionalism, expertise, enthusiasm, willingness to adapt and assist when required and overall team spirit was highly regarded and readily welcome by myself and my team.

WGC2012, the 25th World Gas Conference, was always going to be a complicated event to organise, given the amount of exhibitors, the international nature of the event and venue restrictions (exhibition space located in three different locations) but through intricate planning from your team, guiding myself as to what is best practice for this venue, allowed the exhibition component of the event run smoothly.

Your warmth and hospitality did not go unnoticed and I would be thrilled to be able to reciprocate if and when you and your team are ever in Sydney, Australia.

I hope our paths may cross again in the future and I would be more than willing to provide a reference for your organisation in the future, if ever required. I sincerely hope I have another experience to work in Kuala Lumpur with you all again.

Good luck for future endeavours (and the continued existence of Hall 6!)

Kind regards

Sophie Treasure
Head of Operations
